

The process for uploading an answer from AI is to copy the question and the answer and paste as a message for my Google account. On the PC copy the text and paste into speech Texter. Set the margins and the text as you would like them to appear on TikTok and print to a PDF. Upload the PDF to archive then copy the URL and send to your iPhone. Then make screen copies of the various pages of the PDF and upload to TikTok and pic photos not videos and allow for download
